&

2nd International Conference on

ENVIRONMENTAL AND MOLECULAR BIOLOGY

March 20-21, 2017 Rome, Italy

Antimicrobial activities of seed extracts of *Prunus persica*, *Prunus cerasus*, *Prunus avium* and *Prunus armeniaca*

and
Uludag University, Turkey

Fruits contain phenolic additives which may show more or less antimicrobial effects. Depending on their antioxidant properties phenolic substances, which have effect mostly on color, flavor and durability of fruits and vegetables, are closely related with human health in terms of antimicrobial, anti-carcinogenic and anti-mutagenic activities. In the long term, bacterial resistance against antimicrobial agents may cause problems in fighting against several diseases. Therefore investigation of novel antimicrobial
