

7th International Conference and Exhibition on

September 28-30, 2016 Orlando, USA

Eastern Washington University, USA

The advancement of hyphenated instrumentation from a variety of scientists working in the public and private sectors of research and development in the form of gas chromatography (GC) being coupled to mass spectrometry (MS) has continued to develop into a powerful multi-dimensional hyphenated instrumental technology for the use in a wide assortment of analytical and bioanalytical techniques. Examples of this development can be seen in the analysis of drugs, metabolites,
