10th International Conference on

&

2nd International Conference on

June 12-13, 2017 Rome, Italy

Cristiana Pop

Bucharest University of Economic Studies, Romania

The globalization of overweight and obesity, the acute perception of being stressed most or all the time, the sedentary life style and the comorbidities of those behaviors might be the most common consequences for the new millennium generation and their families. Education and healthcare systems are attempting a weak counteratrasose be6 dn4oca2 (ti(k co)11g(t)6 -5 (d m)4 (osi)7eig)-6.9 n oeir
