

Prevalence of malnutrition and associated factors among children aged 6-59 months at Hidabu Abote district, North Shewa, Oromia

የጤና ጥበቃ ሚኒስቴር
Federal Ministry of Health, Ethiopia

ግብረ ግብር : Malnutrition continues to be a major public health problem in developing countries. It is the most important risk factor for the burden of diseases. It causes about 300,000 deaths per year and responsible for more than half of all deaths in children. In Ethiopia, child malnutrition rate is one of the most serious public health problem and the highest in the world.
