World Congress and Expo on

Optometry & Vision Science

July 17-19, 2017 Chicago, USA

Blue light- yesterday and today

Martin de Tomas
Martin Luther University, USA

My contribution to the event is from my specialty and it is about the new technologies in ophthalmic lenses that exceed 400 nm of visible spectrum protection but without altering the perception of colors. I was able to read the following when I entered the site eye 2017: We s
