

29th International Conference on **Dentistry and Dental Practice**

March 17-18, 2022 London, UK

Journal of Oral Hygiene & Health ISSN: 2332-0702 Volume: 10

Background:

One of the goals that the prosthodontist has to achieve is to construct retentive and stable denture that subsequently enhances both function and esthetics. Subjective and objective contemplate

masticatory ability. While results of some considerations indicated

Flexible acrylic resin liners offer better denture adaptation, patient satisfaction as well as denture retention due to its light weight and engaging more desirable undercuts.
