Optical Illusions and the Science of Color

Optical illusions are a fascinating area of study in psychology and neuroscience. They demonstrate how our brains interpret visual information and how we can be tricked by our own perceptions. The science of color is also a key component of these illusions, as the way we perceive colors can change depending on the context in which they are presented.

Combating neglected tropical diseases

Wei Wang

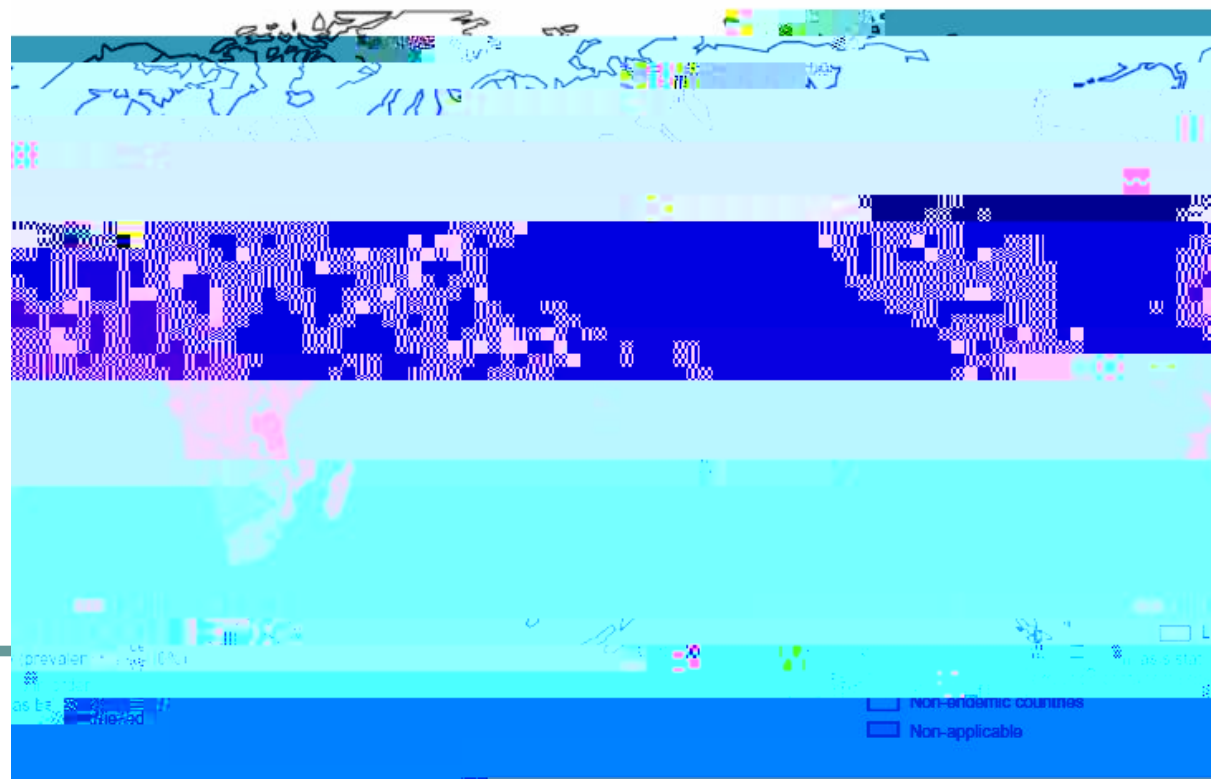

Jiangsu Institute of Parasitic Diseases

Key Laboratory on Technology of Parasitic Disease Prevention and Control, Ministry of Health, P.R.China

Research interests

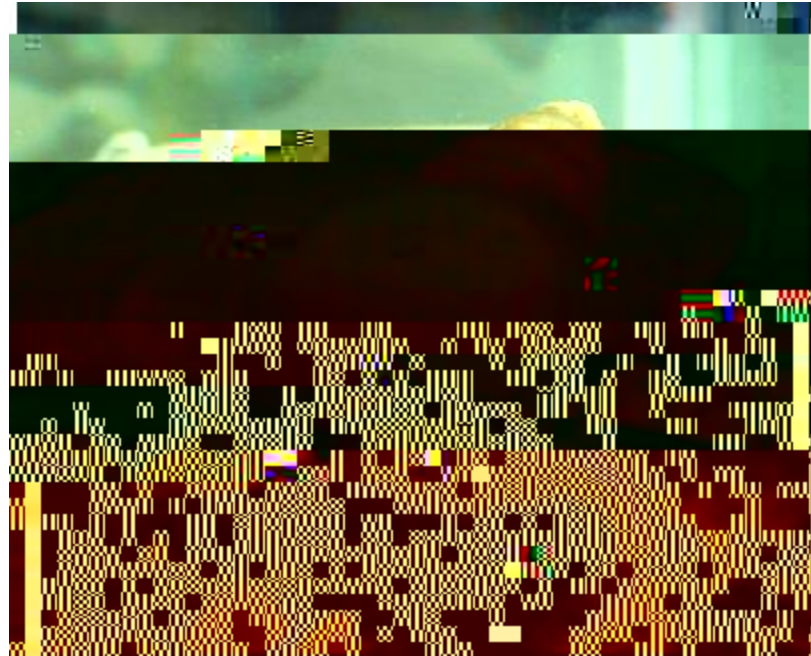

Epidemiology of neglected tropical diseases and emerging infectious diseases

Research interests

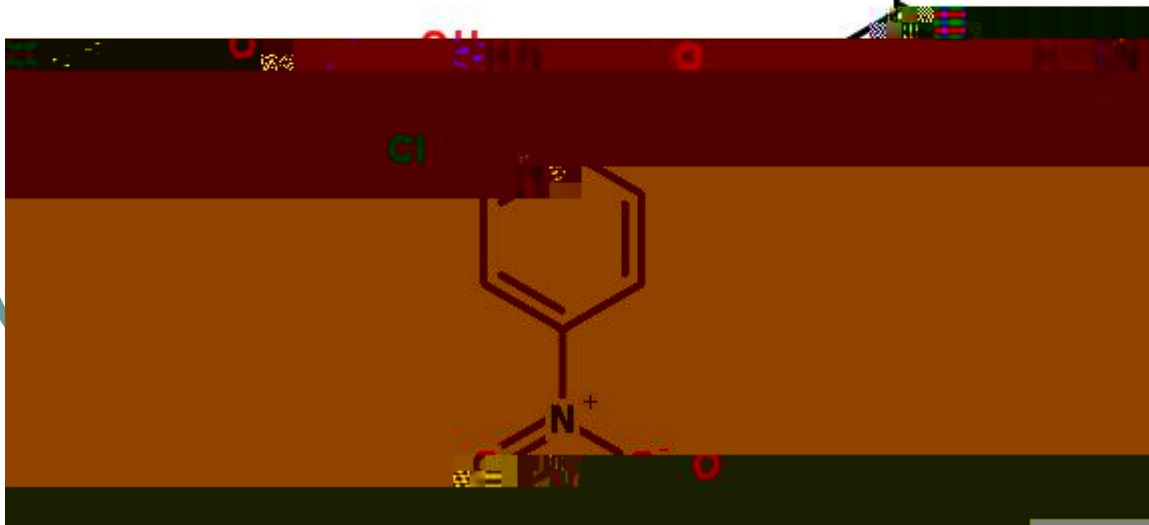

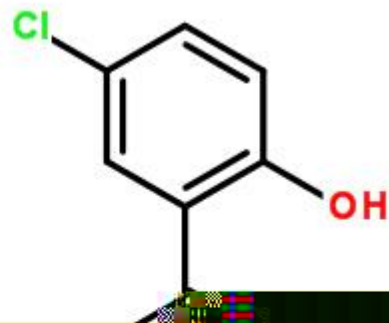

Vector control

Research interests

Screening of novel molluscicides

Research interests

Screening of novel anti-helminthic agents

Research interests

Drug resistance

Current positions

Journal Editor

American Journal of Microbiology

*Chinese Journal of
Schistosomiasis Control*

Current positions

Journal Editorial board member

Asian Pacific Journal of Tropical Biomedicine

World journal of meta analysis

Edorium Journal of Advances in Disease Diagnosis

HSOA Journal of Cancer Biology and Treatment

HSOA Journal of Microbial Pathophysiology and Pathogenesis

HSOA Journal of Clinical Immunology and Immunotherapy

Journal Club of Pharmaceutical Sciences

Current positions

F1000

Peer-reviewed articles

Dr. Wei Wang has published more than 100 peer-reviewed journals, and has a total impact factor of over 100. The articles have total cites of over 300 as shown in Web of Science and more than 400 as revealed by Google Scholar.
