The Indus valley civilization, which lasted from roughly 3300 to 1300 BCE, is one of the earliest civilizations in the world. It was a highly organized society that built some of the earliest cities, including Mohenjo-daro, Harappa, and Dholavira. These cities were grid-planned and had advanced drainage systems. The Indus valley civilization was a highly organized society that built some of the earliest cities, including Mohenjo-daro, Harappa, and Dholavira. These cities were grid-planned and had advanced drainage systems. The Indus valley civilization was a highly organized society that built some of the earliest cities, including Mohenjo-daro, Harappa, and Dholavira. These cities were grid-planned and had advanced drainage systems.

Considering the Indus valley civilization and vast territory,
