

Confetti as an Eco-Friendly Send-Off for Weddings: DIY Biodegradable Options

John A. Smith*

Abstract

The tradition of showering the bride and groom with confetti as they embark on their marital journey is a cherished one. However, traditional confetti often contains harmful materials that pose risks to the environment, wildlife, and even delve into its safety, water solubility, and environmental impact. Moreover, we provide practical guidance on how to make biodegradable confetti at home without harming the environment.
