

HPV-DNA Screening as a Primary Cervical Cancer Screening Modality in Zimbabwe: Obstacles and Recommendations

Ethel Essel*

Department of Emergency Medicine, Canada

Abstract

Keywords: HPV-DNA screening; cervical cancer; Zimbabwe; obstacles; recommendations

Introduction: HPV-DNA screening is a primary cervical cancer screening modality in Zimbabwe. However, there are several obstacles to its implementation, including lack of awareness, limited resources, and inadequate infrastructure. This study aims to identify these obstacles and provide recommendations to improve the implementation of HPV-DNA screening in Zimbabwe.
