

Knowledge, Attitude and Practice Regarding Prevention and Screening of Breast Cancer among Reproductive Age Women

Sanjay Kumar Sah

Abstract:

To assess the knowledge, attitude, and practice regarding prevention and screening of breast cancer among reproductive-age women

Introduction:

Breast cancer is the second most common cancer among Nepalese women and placed a substantial burden on the Nepalese healthcare system, but information regarding the number of women living with breast cancer is not well recorded. Breast Cancer Deaths in Nepal reached 1054 or 0.65%
