

Statement of the Problem:

The problem is to determine the concentration of a substance in a solution. The concentration is denoted by f . The concentration is determined by the amount of substance m and the volume of the solution V . The concentration is given by the formula $f = \frac{m}{V}$. The concentration is determined by the amount of substance m and the volume of the solution V . The concentration is given by the formula $f = \frac{m}{V}$.

Aim:

The aim is to determine the concentration of a substance in a solution.
