We gratefully thank all our magnificent speakers, gathering participants, understudies, affiliations, and exhibitors for making Lab Med 2019 Conference the best ever.

In 2019, the meeting took another bearing, widening its concentration past the research centers to cover all parts of Pathology. This has given an exceptional chance to scholarly and vast correspondence and joint effort and has situated the gathering as the OMICS International's yearly Clinical head occasion.

16th Annual Conference on Laboratory Medicine & Pathology, facilitated by the OMICS International was held amid December 09-10, 2019 Dubai, UAE in light of the subject "Innovative Construction of Pathology". The kind-hearted reaction was gotten from the Editorial Board Members of ME Conferences Journals alongside [resenbil.c](http://resenbil.c)
