Abstract

Incidence of seizure in first year of life is very high. There is a sharp difference between neonatal and post

177 post neonatal seizure patients

76 infants (1 month- 12 months) with seizures

20 excluded:

- 10 patients with focal epilepsy
- 10 patients with AECT
- 10 patients with Neurofibromatosis

56 infants included

6 patients lost to follow up

50 infants studied

5 patients died

and F.P.P. (see 2nd slide)
