

# Psychiatrist Shortage Worsens Amid Mental Health Crisis

Nicole J. Borges

Department of Community Health, Wright State University Boonshoft School of Medicine, USA

## Introduction

Psychiatrist shortage is a global phenomenon, and it is expected to worsen in the coming years. The shortage is caused by a number of factors, including a decline in the number of psychiatrists entering the profession and an increase in the number of people with mental health needs.

The shortage of psychiatrists is a global phenomenon, and it is expected to worsen in the coming years. The shortage is caused by a number of factors, including a decline in the number of psychiatrists entering the profession and an increase in the number of people with mental health needs. In the United States, the number of psychiatrists per capita has declined from 1980 to 2013, and this decline is expected to continue (1-5). The shortage of psychiatrists is a global phenomenon, and it is expected to worsen in the coming years.
