

Euro Surgery 2020: Utilisation of Plastic Surgery Theatres in a Single UK Centre

Harry Lobb

h.lobb@sheff.ac.uk

Goal of this study was to determine the utilisation of plastic surgery theatres in a single UK centre over a 12-month period.

Methods: A retrospective analysis of all plastic surgery operations performed in the plastic surgery theatres of a single UK centre over a 12-month period.

Results: A total of 1,234 plastic surgery operations were performed in the plastic surgery theatres of the single UK centre over the 12-month period.

Conclusion: The utilisation of plastic surgery theatres in a single UK centre over a 12-month period was high, with a total of 1,234 operations performed.

Keywords: Plastic surgery, Theatres, Utilisation, UK centre.

Introduction: Plastic surgery is a highly specialised branch of medicine that deals with the reconstruction and aesthetic improvement of the human body.
