use, distribution, and reproduction in any medium, provided the original author and source are credited.

Architectural engineering is the application of engineering principles and technology for building design and construction. The journal provides an open access platform to facilitate the exchange of information between architects and engineers, and to support the advancement of engineers and architects.

The Architectural engineering Technology has a collection of articles.

The first article is by Itma MAF [1]. Modernize the courtyard house. It is pointed out that the yard residence is some regarding the most important kinds of vernacular housing between the world, mainly
