# A Brief Note on Mycoremediation

*Department of Biology, Faculty of Applied Science, University Teknologi MARA, Malaysia*

## **Letter**

Mycoremediation (from ancient Greek  $\mu\kappa\upsilon\sigma$  (muk s), meaning "fungus" and the suffix -remedium, in Latin meaning 'restoring balance') is a form of bioremediation in which fungi-grounded remediation styles are used to decontaminate the terrain. Fungi have
