May 30, 2013;

... if we can do that we could make a significant difference to the way in which chronically ill people are managed... P. P. ...

### Data analysis

... get doctors and other health professionals used to it... P. P. ... product with a future market, both in Australia and overseas... P. P. ...

### Ethics

... if we come out of this project with some understanding of working dynamics between the organisations, establish a framework for collaboration, enroll a modest number of GPs and patients, and get our processes it right, then... my expectations have been fulfilled P.

### Findings

#### Expectations at the beginning of the project

... if we can do that we could make a significant difference to the way in which chronically ill people are managed... P. P. ...

... get doctors and other health professionals used to it... P. P. ...

... product with a future market, both in Australia and overseas... P. P. ...

... if we come out of this project with some understanding of working dynamics between the organisations, establish a framework for collaboration, enroll a modest number of GPs and patients, and get our processes it right, then... my expectations have been fulfilled P.

#### The collaborative relationships in the project

... kind of burdened or slowed down the rate of adoption of CDMS in the field. P

... all of us trying to understand what the others' objectives were. P

... it has been challenging and it forced us to highlight the different expectations around accountability, different perspectives, other parties wanted technology and commercialisation, which was a different perspective from where I was. P

### Perception of outcomes/benefits of the project
