

Primary Objectives

- To conduct research and primary data on select focus groups (Organisations, Charities, Sustainable Households) surveying the acceptability and plausibility of a Carbon Tax.
- To communicate and build early relationships between BU and the environmental community on a local (Dorset) level for future collaborative efforts against the Climate Crisis.
- To educate and drive broader environmental thinking through a variety of esteemed presentations with varying academic opinions and data sources.

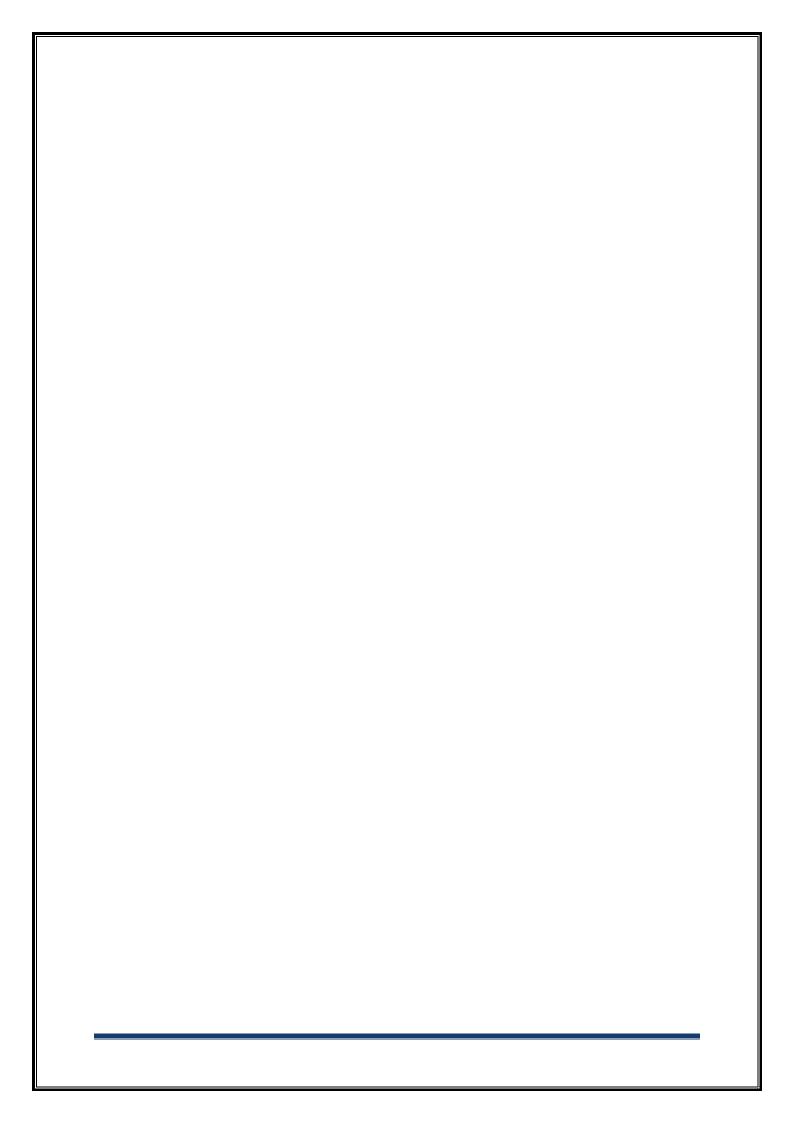

Event Summary

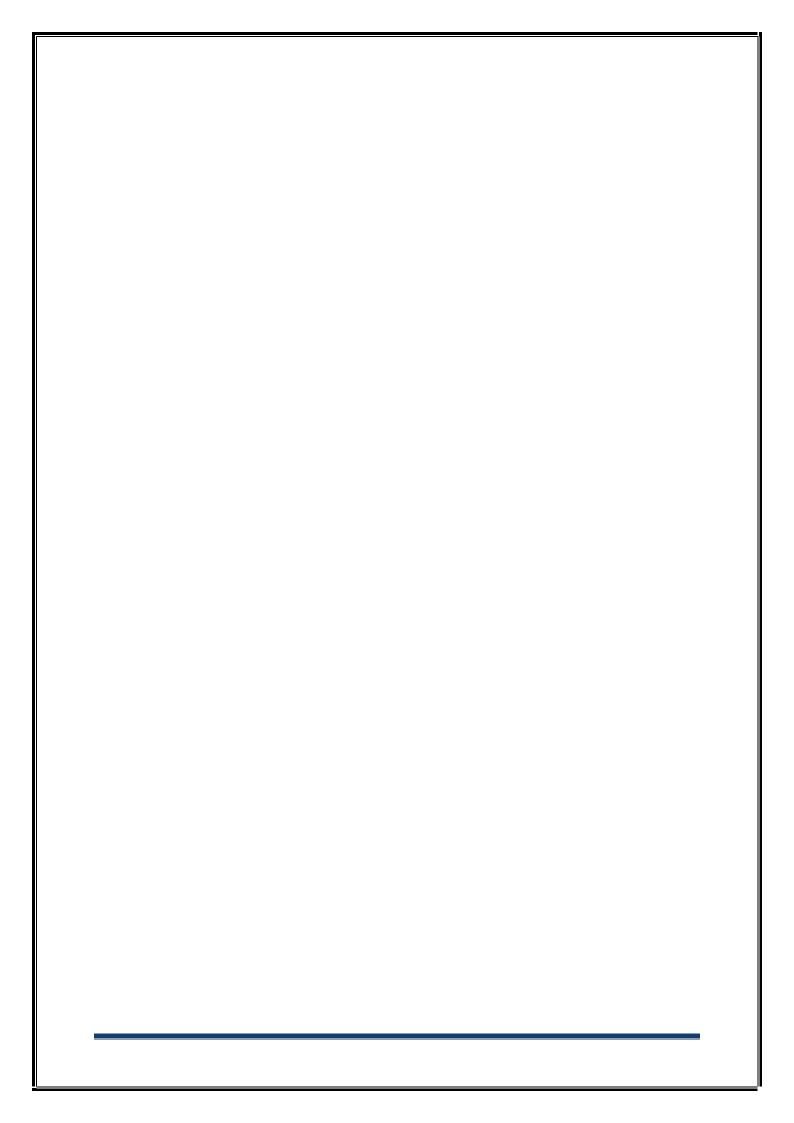

Recent agreements following Cop26 have opened up several avenues for environmental researding offset the Climate Crisis through fiscal policy such as a Carbon Tax may be a viable approach; however such policies can only be achieved successfully when considering the impact on all enterprises involved.
