

**Supplemental Tables**

| <b>Time point</b> | <b>Electrolyte</b> | <b>n (data available)</b> | <b>Mean</b> | <b>SD</b> |
|-------------------|--------------------|---------------------------|-------------|-----------|
| Pre-transplant    | potassium          | 309                       | 4.5         | 0.7       |
|                   | calcium            | 309                       | 9.3         | 1.0       |
|                   | magnesium          | 173                       | 2.2         | 0.4       |
| 2 days            | potassium          | 259                       | 4.4         | 0.6       |
|                   | calcium            | 259                       | 8.7         | 0.9       |
|                   | magnesium          | 258                       | 2.1         | 0.3       |
| 2 weeks           | potassium          | 191                       | 4.8         | 0.7       |
|                   | calcium            | 193                       | 9.6         | 0.9       |
|                   | magnesium          | 183                       | 1.7         | 0.3       |
| 1 month           | potassium          | 202                       | 4.4         | 0.5       |
|                   | calcium            | 202                       | 9.7         | 0.7       |

**Follow-**

**Supplemental Table 2:** Number of patients who have missing QTc values at each time point.
